🔗 INTRODUCTION

Full Stack Software Engineer with hands-on experience building user-focused, high-performance web applications and scalable backend systems. Proficient in modern frameworks including React.js, Next.js, and Node.js, with practical experience in real-time databases, and delivering end-to-end production-ready solutions.

📁 PROFESSIONAL EXPERIENCE

Full Stack Developer, Zero to One

10/2025 – Present

- Contributed to **10+ full-stack projects** using **React.js, Next.js, Node.js, Supabase, and MongoDB**.
- Resolved **25+ bugs** and optimized client projects, boosting performance and user experience by **30%**.
- Skilled in deployment processes, including fixing build and server errors to ensure **smooth delivery**.

Frontend Developer Intern, Fortify

07/2025 – 09/2025

- Contributed to frontend, backend, and integration tasks for Fortify's mobile app and website.
- Revamped UI/UX and fixed **5+ critical bugs**, improving usability and performance.
- Worked on Google Ads, TikTok, and LinkedIn, enhancing ad tracking accuracy.
- Performed frontend, backend, and end-to-end testing for stable, bug-free deployments.

Web Developer Intern, DevRolin

08/2024 – 10/2024

- Leveraged Firebase for backend functionalities (real-time data sync, secure hosting) and developed full-stack applications using the MERN stack (MongoDB, Express.js, React.js, Node.js).

📁 PROJECTS

Freelance Project – Dropshipping Website

- Developed a MERN-based dropshipping website with user authentication, cart functionality, and product management features.
- Integrated JWT authentication and automated email notifications for a secure and smooth user experience.
- Built role-based dashboards for admins and sellers to efficiently manage orders and inventory.

CopyRank

- Developed an end-to-end **AI-powered platform** using Next.js and Supabase, fully built and deployed at Zero to One.
- Created custom APIs to scrape user websites using the Qwen model, analyze their niche, and fetch keywords via an SEO API.
- Integrated the Qwen API for AI-generated articles and implemented the Lemon Squeezy gateway for secure, subscription transactions.
- Integrated WordPress and Framer for automated blog publishing and content management.

Mortgage Financial Arena

- Contributed to an AI-powered social media platform for mortgage brokers, focusing on frontend development, authentication, and core feature implementation.
- Developed responsive UI components and integrated REST APIs to support seamless content workflows and platform functionality.
- Performed testing, bug fixing, and performance improvements to ensure application stability and smooth user experience.
- Collaborated with the development team to deliver features and enhance overall system reliability and usability.

Stafftrackerfb

- Designed and implemented a CI/CD pipeline to automate build and deployment processes for a separate project.

Boldfusion

- Developed a backend to fetch and manage data from WordPress ACF fields and integrated it with a custom frontend application.
- Deployed both frontend and backend on CyberPanel, handling server configuration, domain setup, and hosting.

Artful Swipe

- Developed a **full-stack product showcasing platform** using **Vite (React)** and **Supabase** at *Zero to One*, featuring over **2,300+ scrapped products** from the Monwysworth website.
- Implemented **user authentication** with Supabase Auth and built **role-based dashboards** for admins (product management, analytics) and users (favorites, value tracking).
- Designed an **interactive and dynamic interface** for real-time product listings, enhancing user engagement through favorites and personalized value calculations.

Erosa

- Developed a backend to fetch and manage data from WordPress ACF fields and integrated it with a custom frontend application.
- Deployed both frontend and backend on CyberPanel, handling server configuration, domain setup, and hosting.

Stripe Integration

- Developed a payment system using React Node.js, and Stripe Api for secure transactions.
- Designed backend APIs and a responsive UI for cart management and checkout.

EDUCATION

University of Karachi (DCS -UBIT)

Bachelors of Science in Computer Science

2023 – present
Karachi, Pakistan

Govt. Degree Science/Commerce College Malir Cantt

HSC Intermediate in Pre-Engineering

2020 – 2022
Karachi, Pakistan

SKILLS

Technical Skills

HTML, CSS, JavaScript, React.js, Next.js, Redux, Zustand, Node, Express, MongoDB, Firebase, Supabase, Wordpress, Zoho, CI/CD Pipelines, Python, MS Excel

Soft skills

Statistical & Analytical skills, Leadership, Project Management, Communication, Marketing

CERTIFICATES

Google Data Analyst Certificate

Data Analyst course by Google

EXTRA-CURRICULAR ACTIVITIES

Karachi ACM-W Professional Chapter

Technical Lead

2024 – present

Google Developer Groups on Campus - UoK

Technical team lead

2025 – present
